ZENITH
QUOTING

Your quoting, done.

The Zenith Quoting Desk, for small CNC machine shops

Email me your RFQ prints. I send back finished, itemized quotes at your shop's rates, checked line by line, ready to send under your name.

HOW IT WORKS

1. Email your RFQ prints to **quotes@zenithquoting.com**, the way you'd forward them to an estimator.
2. I price each print on **your** machines and rates, and I check every line.
3. You get back a finished, itemized quote with your logo.
4. You look it over, change anything you want, and send it under your name. I never contact your customer.

HOW I STAY ACCURATE

- Before anything counts, I price 3 to 5 jobs you've already quoted, so you can see line by line how close I land.
- Anything I'm unsure of is flagged on the quote, not hidden.
- Tell me which quotes you won, and my numbers move toward yours.

WHAT YOU GET

- **Your machines, your rates, your logo.**
- Every line shown: material, setup, programming, run time and inspection.
- Your own login to price a part yourself any time you can't wait for me.
- Turned and mill-turn parts from bar or tube.
- Your prints stay private. Ask and I'll delete them.
- No ITAR or export-controlled work. Every print is checked for export markings first.

Your first 10 prints are free while I learn your rates.

After that, $399 a month for up to 40 prints, plus $10 per extra print.

Founding shops: my first five shops lock in **$199 a month for 12 months.**

Nothing is charged unless you agree to it in writing.

WHY SHOPS USE IT

About 10 years
to train a good CNC estimator on a shop floor

$70,000 to $80,000
a year, what posted estimator jobs pay

$199 a month
for my first five shops, with your first 10 prints free

Send me a print you've already quoted.
